WORKING PLATFORMS FOR CONICAL PROCESS VESSELS

MPF Series

- > Fast and easy installation via manhole or other vessel nozzles
- > Stiff aluminium design with low net weight
- > Simple handling
- > Modular design for high flexibility
- > Rubber pads for optimal protection of the vessel surface
- > Optional rescue hatches and special solutions
- > CE compliant with user manual

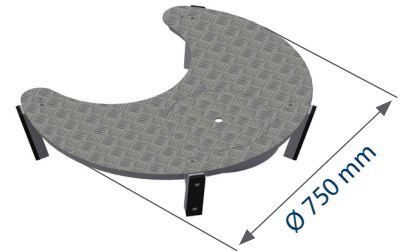

Intelligent & Individual Solution for Service Work on Conical Process Vessels

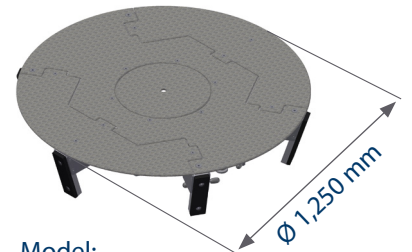

Tight safety regulations and high assembly efforts of a suitable working platform increase the complexity of service work on conical process vessels. For these requirements, BOLZ-SUMMIX has designed intelligent working platforms for conical process vessels. With their modular design, they are customizable and allow easy, fast and safe service and maintenance on reactors, orbital arm and screw dryers as well as conical mixers. The specifications of the working platforms range from a diameter of 750 millimeters and a useable volume of approximately 1,750 liters up to 2,600 millimeters and approximately 12,000 liters.

Safe, fast and easy to install

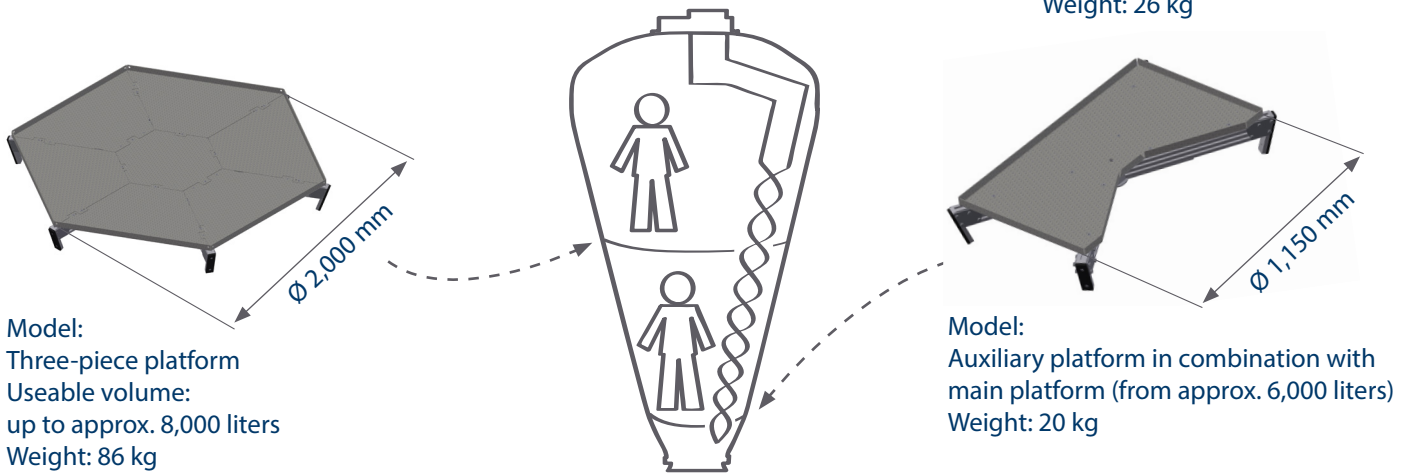

The working platforms consist of a stiff aluminium construction. They are CE compliant and can be reused for many years. Their modular design enables installation via manhole or other vessel nozzles. The individual modules have a low net weight (< 20 kg) and are easy to handle: The platform is easily assembled and securely fastened with just a few bolt connections and quick-lock connections. Special exchangeable rubber pads protect the vessel's wall surface. The platforms are available with optional rescue hatches and any type of flaps as well as additional features such as ladders.

Model: One-piece
Useable volume: up to approx. 1,750 liters
Weight: 18 kg

Model:
Two-piece platform
Useable volume: up to approx. 3,000 liters
Weight: 26 kg

Model:
Three-piece platform
Useable volume:
up to approx. 8,000 liters
Weight: 86 kg

Model:
Auxiliary platform in combination with
main platform (from approx. 6,000 liters)
Weight: 20 kg

HEINKEL Drying and Separation Group

The HEINKEL Drying and Separation Group combines more than 130 years of experience, reliability and innovative power of internationally operating companies in filtration, centrifugation, mixing and drying technology.

Our **COMBER**, **BOLZ-SUMMIX**, **HEINKEL** and **JONGIA** brands have an excellent reputation all over the world.

The group offers one of the most extensive product portfolios for the pharmaceutical, fine chemical, chemical and food industries. Your quality and reliability.

We develop and produce top-quality components and full systems for separating solids from liquids and offer comprehensive after sales service.
